

## LONGER TREADLIFE HELPS DRIVE YOUR BOTTOM LINE.

The groundbreaking 703ZL™ was the first tire born from our revolutionary Zenvironment® concept. Utilizing state-of-the-art technological advancements, we developed a compound, tread design and casing construction that offers longer treadwear and the lowest rolling resistance in the category.

### DEEPER TREAD DEPTHS MEANS LONGER WEAR

#### 32/32" Tread Depth

The deepest original tread depth of any long-haul drive tire in the industry delivers exceptionally long treadwear.

#### Revolutionary Casing

Backed by a 7-year warranty, our latest compound technology distributes contact pressure more evenly across the surface.

### GENERATES LESS HEAT TO LOWER ROLLING RESISTANCE

#### Zenvironment Compound

Utilizes technology to produce stronger and more pliable rubber that significantly reduces heat build up, improves treadwear and provides the lowest rolling resistance in its category.

### ENGINEERED FOR MAXIMUM DURABILITY

#### Zenvironment Casing

Built with technology that allows us to accurately predict changes in tire shape that occur in early stages of wear resulting in dependable performance over the life of the tire.

#### Funnel Shaped Grooves

Prevent stones and debris from reaching the bottom of the groove where they can cause premature casing damage.

### IT'S IN OUR DNA.

Our innovative business philosophy, SmartSolution®, is our commitment to meeting the most essential demands of today's fleets: Longevity, Efficiency, Availability and Dependability.

Zenvironment engineering reduces fuel consumption, waste and pollution by utilizing advanced construction and manufacturing.

### SmartWay® Verified

Our 703ZL is one of many Yokohama tires designed to meet SmartWay's stringent low rolling resistance criteria.
