

DURABLE DESIGN FOR ON/OFF-HIGHWAY ALL-POSITION APPLICATIONS.

The MY507A™ is designed to provide outstanding durability and performance for wide base on/off-highway applications. Equipped with the latest Yokohama technology to extend casing life in tough applications, the MY507A is the perfect choice for vehicles such as concrete mixers, dump trucks and waste/sanitation trucks.

LONGER SERVICE LIFE

Deep Groove Depth

A deeper groove depth and special anti-chip tread compounding enable the MY507A to provide long on/off-road mileage without sacrificing durability.

Stone Rejection Blocks

Stone rejection blocks in tread grooves improve durability and retreadability.

AGGRESSIVE TRACTION

Wide Block Type Rib

Special tread design provides outstanding wear resistance and excellent traction in mud, snow and wet conditions.

Funnel-Shaped Grooves

Engineered to increase block rigidity for added traction and enhanced resistance against uneven wear and superior ride comfort.

OUTSTANDING DEPENDABILITY

STEM-2 Technology

StrainEnergy Minimization extends the life of the casing by minimizing harmful flex, which greatly reduces strain on the critical bead and shoulder areas.

IT'S IN OUR DNA.

Our innovative business philosophy, SmartSolution®, is our commitment to meeting the most essential demands of today's fleets: Longevity, Efficiency, Availability and Dependability.

STEM-2

StrainEnergy Minimization

Our STEM 2 technology reinforces the casing, minimizing the damaging effects of strain energy created from heavy loads, heat, rough roads and everyday operations.
